DETAILED ACTION

Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 2, 11 to 15, 27, 29 and 41 to 45 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. For example, the terms "in particular" in Claims 2 and 12 and "preferably" in Claim 29 are speculative and fail to distinctly define the invention. Furthermore, no clear antecedent bases are found for "the component", "the free end faces", "the flat plate part" and "the cutting edges" in Claim 2, or for "thereof", "the three-dimensional shape", "the latter", "the cutting plate" and "the projection" in Claim 29.

- 3. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 4. Claims 15 and 29 are also rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably

Application/Control Number: 10/723,163

Art Unit: 3725

convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. No clear disclosure is found of a "rotating cutting element", as recited in these claims.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 2, 11 to 14 and 27, as understood, are further rejected under 35 U.S.C. 103(a) as being unpatentable over Jung in view of Cowan et al.

Jung discloses roller-forming a three-dimensional corner having a projection 5, and advises that the projection is trimmed off of the edge walls in the finished article.

Jung does not disclose how the projection is cut off.

Cowan et al. discloses trimming excess material from the bottom of a drawn metal article by the use of reciprocating cutting blades 42 and a bearing element 45 with guide surfaces, and advises that exact dimensions are obtained.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to employ a bearing support and reciprocating blade, as shown by Cowan et al., to perform the projection trimming of Jung following the suggestion that exact dimensions can be obtained. The orientation of the device, as recited in Claims 13 and 14, is of no consequence.

Conclusion

Application/Control Number: 10/723,163

Art Unit: 3725

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lowell A Larson whose telephone number is 703 308-1873. The examiner can normally be reached from 8:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alan Ostrager can be reached at 703 308-3136. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free)
